Carnegie Mellon Robotics Academy

Certificate of Achievement

Software Foundations Micro-Certification (Arduino ShieldBot)

is awarded to

Rohan Reddy Bandi

This certification demonstrates proficiency in sequential programming, making decisions, and utilizing macros and variables with Arduino ShieldBot. Participants are able to take existing code, modify it, and download it to a robot. Participants also must program a vision sensor for the robot to navigate. This certification requires 40 hours of hands-on training.

Earned on Mar 28, 2023
